Dear Parents,

Dentistry has always been an important part of my life, and my mother would even say it is a profession I literally “fell into.” As an infant, I fell and knocked out all of my baby teeth, resulting in numerous dental visits at a very young age. However, my amazing pediatric dentist, Dr. Litteken, and his team, routinely took extra time to help me feel comfortable and special. As a result, I always loved going to the dentist, and knew I wanted to be a part in helping other children feel the same way.

During college, I became a dental assistant and worked in an office while I applied to dental school. I enjoyed seeing all patients but found the greatest joy when treating children. Whether it was helping children through their first dental experiences or talking them through their first fillings, I always felt a sense of pride seeing them accomplish something they initially thought was “scary.” Once in dental school, during any free time, I felt an internal pull to the pediatric dental clinic and the children’s community clinic. It was through these experiences that I discovered my strengths and talent in treating children and my internal drive towards a career in pediatric dentistry.

My team and I strive to make every child’s visit as welcoming and fun as possible. I believe in treating every child with respect and providing individualized care. Thank you so much for choosing me to be a part of your dental family and for helping me fulfill my dream of providing children compassionate care. I am excited to build a lifelong relationship with your families and improve your children’s dental health. If there is anything I can do to make your visits better, please feel free to let me know. I look forward to seeing you soon!

Sincerely,

Stephanie M. Brown, DDS, MSD
